## Irvington High School's Art Shocks Livingston Mall

Shoppers walked by in awe at the art as art teachers Ms. Mickelsen and Mr. Korski set up the works. "This is amazing art!", one woman said. We heard many more people telling us the same thing again and again. Passersby were impressed by the skill and creativity exhibited by the school. It was a great opportunity to show Essex County that Irvington High School has truly gifted and talented students. Mr. Massac's pottery showed the skill and craftsmanship of our school pottery classes as well as Ms. Foote's students' drawings. Ms. Mickelsen's students' art work filled the tables with a diverse array of work from drawings to crafts. Mr. Korski's art students' showed their technical and creative abilities. The show was a huge success with many praises from shoppers, teachers and students observing the work. Many other schools from Irvington district had also shown their work. The success of the show further supports the fact that Irvington is still on the map and the Arts Department will continue to grow. We are all very proud of our students' commitment to the arts. Be sure to expect an even better show next year!

“A Sunday on La Grande Jatte”  
by  
Georges Seurat

Believe it or not the painting above is made of thousands of tiny painted dots. The dots blend together to make the image appear whole. The painting depicts a beautiful spring day in La Grande Jatte, a park in Paris, France. The painting appears small but is actually very large, it is (6 ft 10 in x 10 ft 1 in) in size. Seurat believed that using tiny dots would show color more vividly than standard brush strokes.

Seurat must have been right because the painting has an inner glow and truly shows the warmth of spring. They don't call him "Seurat the Dot" for nothing.
